Pt presents for core and crown on tooth # 14 due to fracture. Tooth was restored while patient was working on a cruise ship by a dentist recommended to her in Miami FL. It was restored twice and fractured. It was painful after each restoration. Pt was treated with ibuprofen and tylenol and eventually was given pain med. Very large composite restoration. She states that he added bonding the first time and when she went back he added cement. She was charged more than 700\$ and she is frustrated with outcome. Discussed options for tooth, pt elects to have crown on #14. Pt understands that due to size of restoration and previous pain that there was Reviewed med history: No C/I to dental tx Xray read by Dr Topical was placed, the patient was given 2 total carpules of Septocaine, 4% with Epinephrine 1:100,000, to achieve satisfactory local anesthesia results. Prepped tooth, removed decay. Core BU placed with Fuji IX. Placed retraction capsule, polyether impression taken. Temp made with Protemp. Cemented with Relyx temp Issues: Shade A3, porcelain/ceramic substrate

Post op instructions given NV: Crown seat # 14  
 Pt presents for restorative on tooth #15 O due to recurrent decay  
 Pt consents to treatment  
 Reviewed med history: NO CHANGES  
 No C/I to dental tx  
 Xray read by Dr.

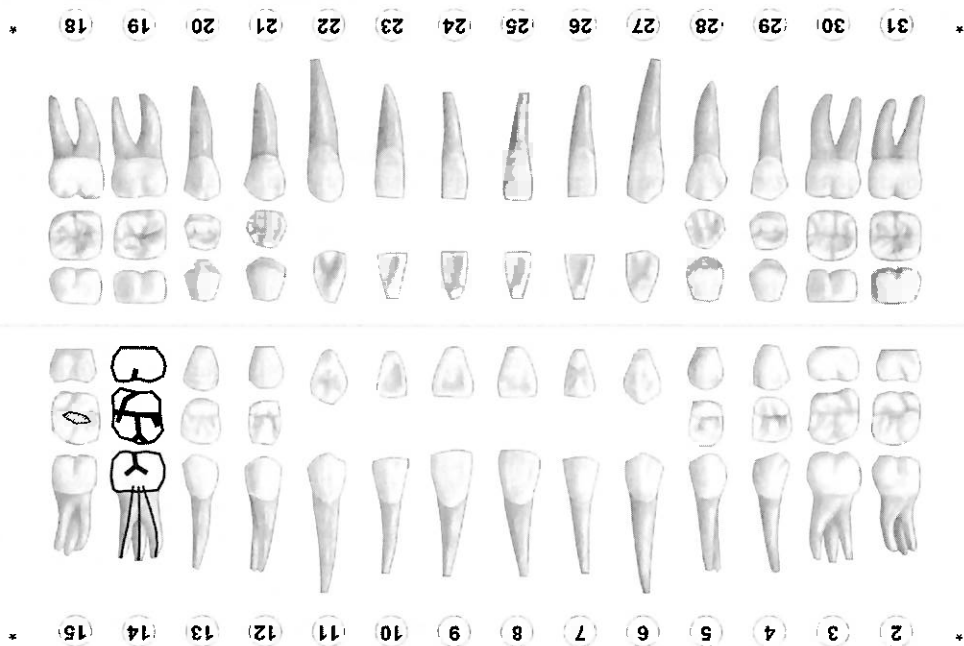

Topical was placed, the patient was given 1 total carpules of Septocaine, 4% with Epinephrine 1:100,000, to achieve satisfactory local anesthesia results.

10/4/2021 DR02 Clinical Note  
 Pt CC is lost restoration on upper left. #14 was filled in 2018 here. She was employed by a cruise line and was abroad when restoration was lost. She saw dentist there. Tooth was hurting. She states that dentist put bonding on tooth. It was still hurting and it came off and she went back and he filled it again. Pt states she has spent about \$700. Tooth is hurting more now but has been uncomfortable for months. Distal is fractured and tooth is need of crown due to size of restorations. Will proceed with crown. Due to depth of restoration and patient being uncomfortable, pt may need RCT.
